

INGENIA

YOUR PARTNER FOR
CUSTOM-MADE SOLUTIONS.

INGENIA
asmag group

IN EVERYTHING THAT WE DO. TOP QUALITY PRODUCTS AND SERVICE STANDARDS

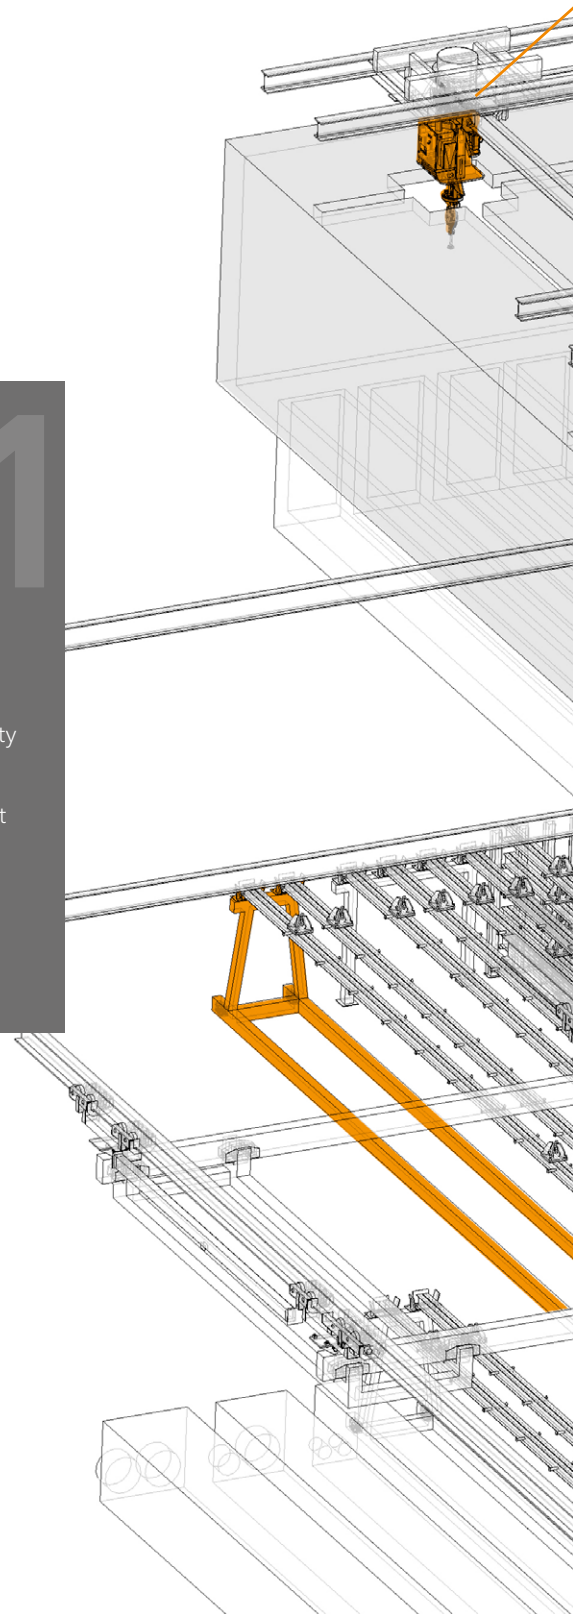

INGENIA develops products to withstand adverse conditions of plants in emission loaded surroundings.

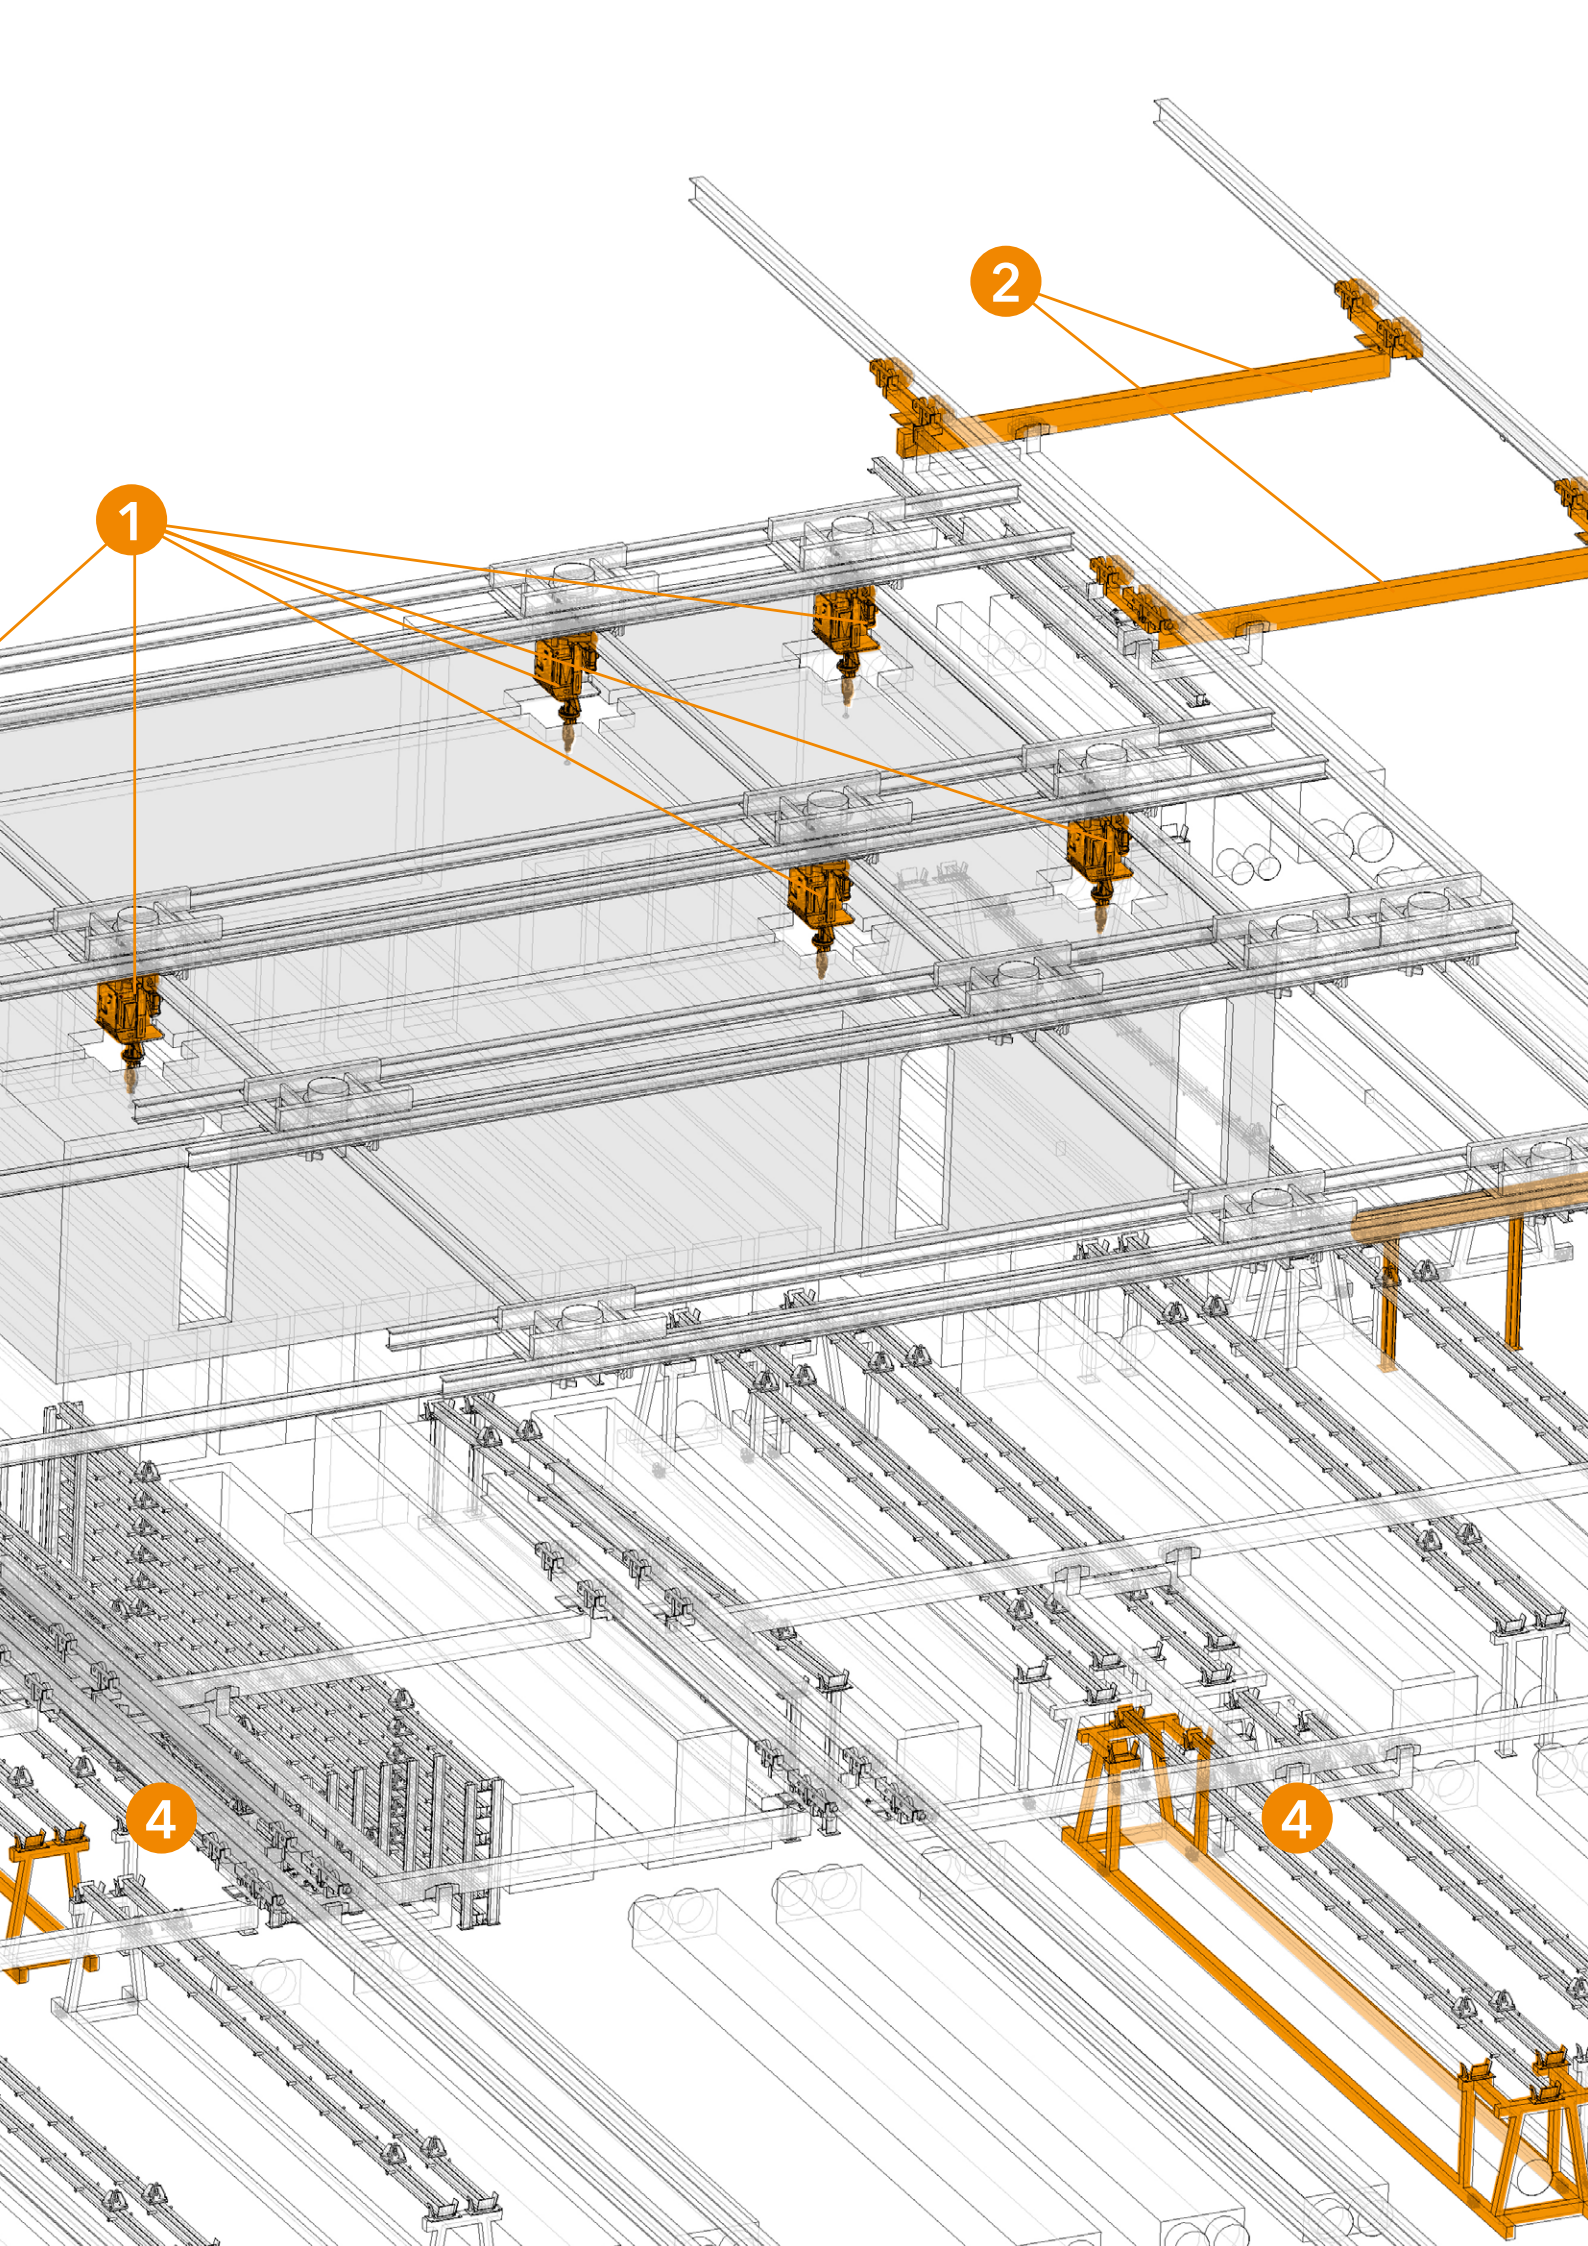

The equipment is custom-made and is characterized for its robust built, long lifetime cycle and low maintenance requirements.

INGENIA CHAIN + MONORAIL HOISTS

- Custom-made Design
- Highest safety standards
- High life cycle and availability
- 100% duty cycle
- Solid and corrosion resistant
- Continuous variable hoist speed
- Chain monitoring
- Compact design for narrow space

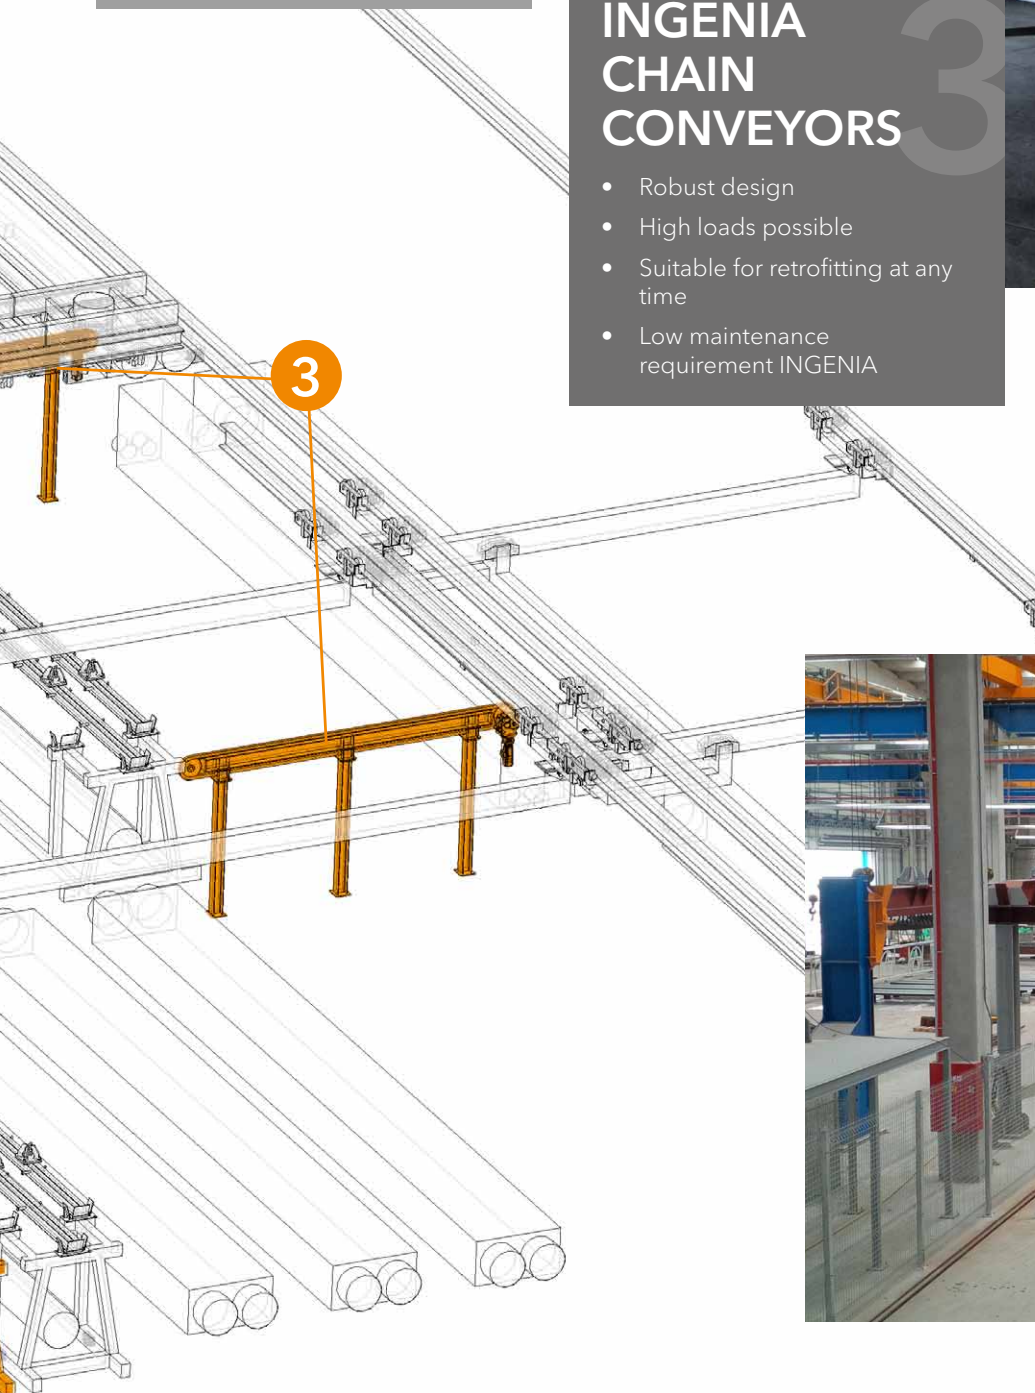

INGENIA DISTRIBUTION CRANE

- Custom-made Design
- Highest Safety Standards
- High life cycle and availability
- Solid and corrosion resistant

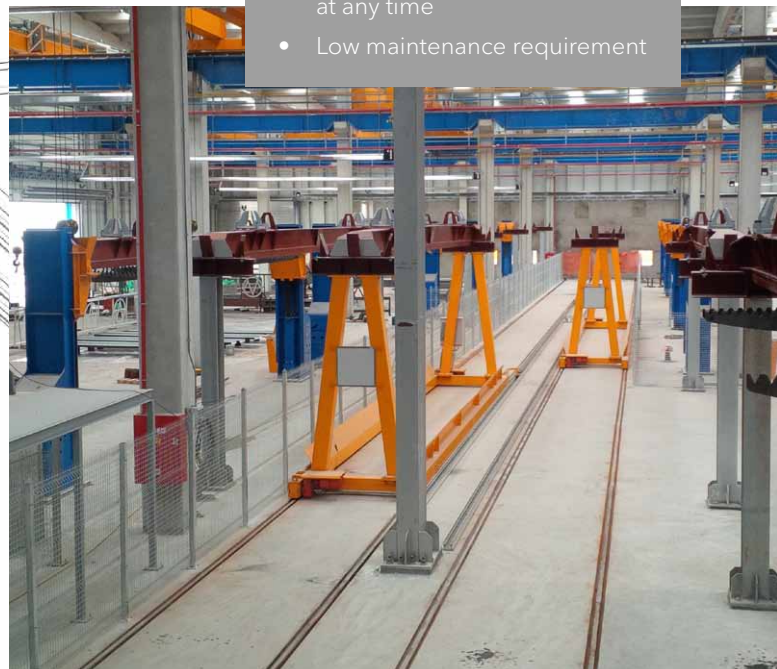

INGENIA CHAIN CONVEYORS

- Robust design
- High loads possible
- Suitable for retrofitting at any time
- Low maintenance requirement INGENIA

INGENIA FLOOR TROLLEY

- Robust design
- Heavy working loads possible
- Suitable for retrofitting at any time
- Low maintenance requirement

PUT YOUR TRUST IN THE NO.1 CUSTOMIZED MATERIAL LOGISTIC SOLUTIONS FOR EMISSION LOADED AREAS

Material logistics, crane and handling technology constitute the most important interfaces in a production plant. They are the key elements in the retention of long-term, production cycle stability and facilitate smooth processing in its truest sense.

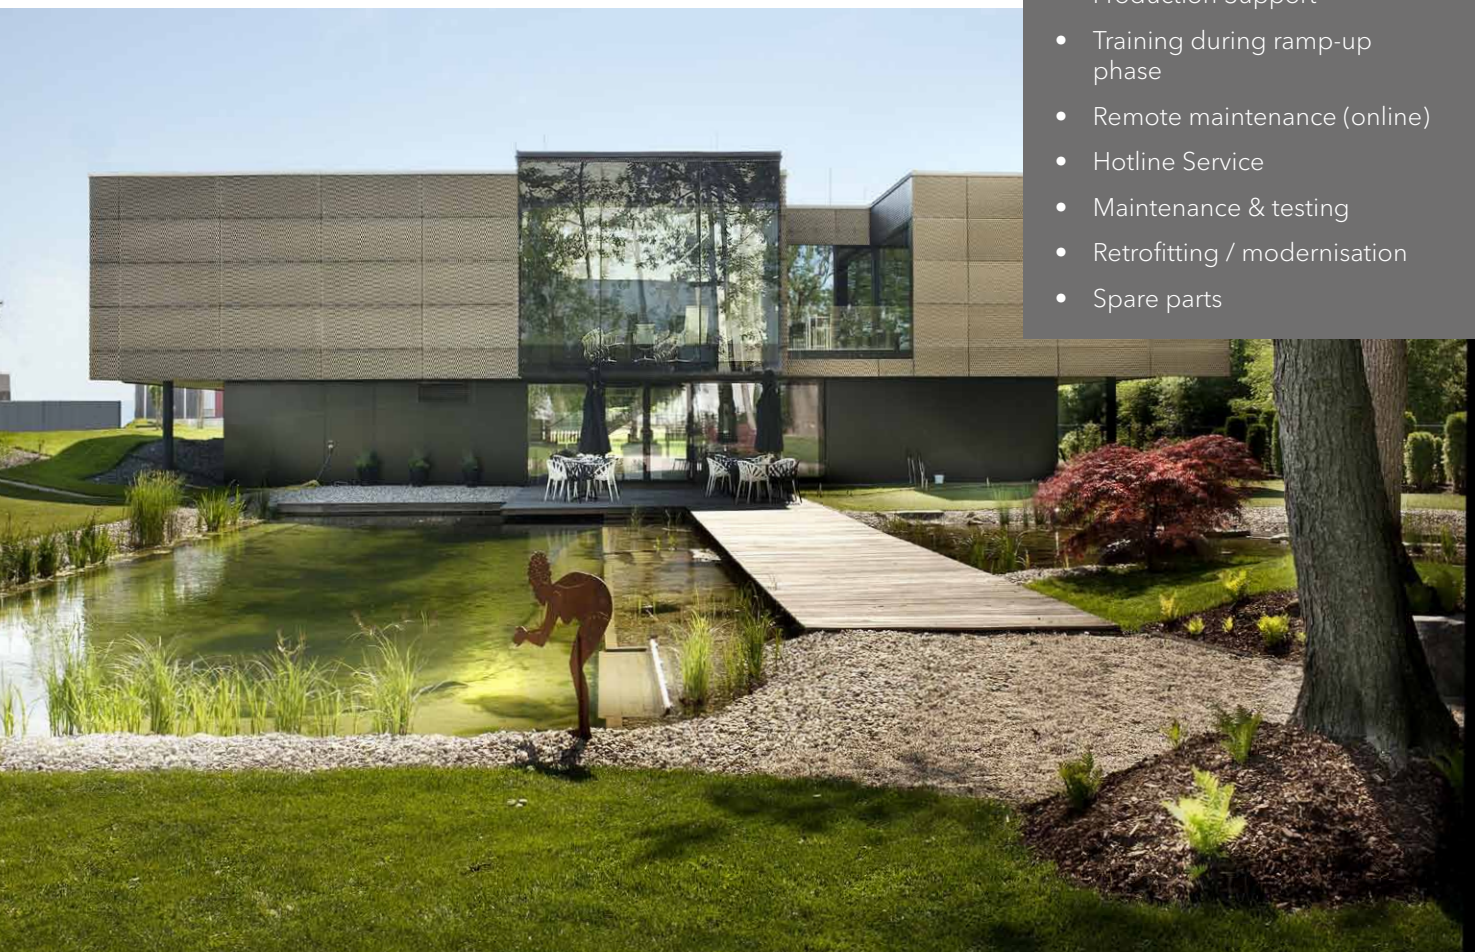

At INGENIA, we plan the entire, partially- or fully-automated material logistics and handling technology for emission loaded areas with closed processes.

We complete plants in line with individual demands, the very latest standards and the state of the art with the result that every project constitutes an original. We seek to further the success our national and international customers by means of future orientated concepts.

INGENIA provides professional support throughout the entire life cycle of customer plants. Individual service and maintenance packages in identical quality are available worldwide.

INGENIA SERVICES:

- Installation monitoring
- Production Support
- Training during ramp-up phase
- Remote maintenance (online)
- Hotline Service
- Maintenance & testing
- Retrofitting / modernisation
- Spare parts

INGENIA IS PART OF THE ASMAG GROUP

ASMAG is an innovative group of companies mainly active in the development and construction of machinery and plants for the steel and nonferrous metals industry. It covers the whole range from tube welding lines over straight drawing machines and finishing equipment up to automatic handling systems – ALL FROM ONE SOURCE.

ASMAG asmag group

- Pointing Machines
- Drawing Machines
- Straightening Machines
- Saws
- Cutters
- Stacking and Bundling Lines
- Continuous Extrusion Lines
- Automatic Handling Equipment

SEUTHE asmag group

- Tube Welding Lines
- Roll Forming Lines
- Cage Forming Lines
- Flying Saws
- Automatic Handling Systems

INGENIA asmag group

- Automatic Handling Systems
- Automatic Cranes
- Galvanizing Lines
- Pickling Lines
- Individual Solutions
