

# VIBRATORS

# WHY TO USE VIBRATORS

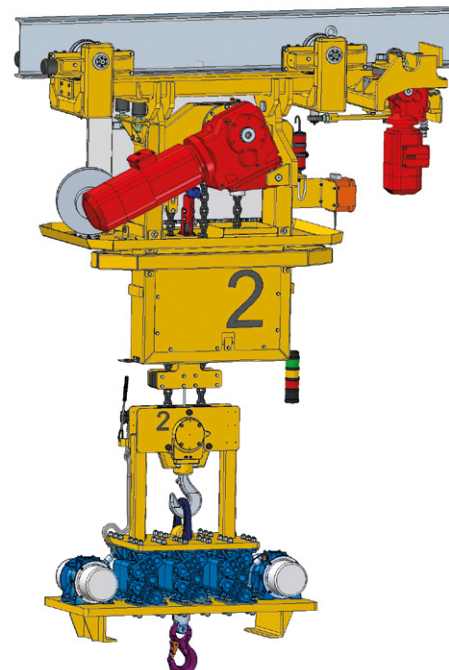

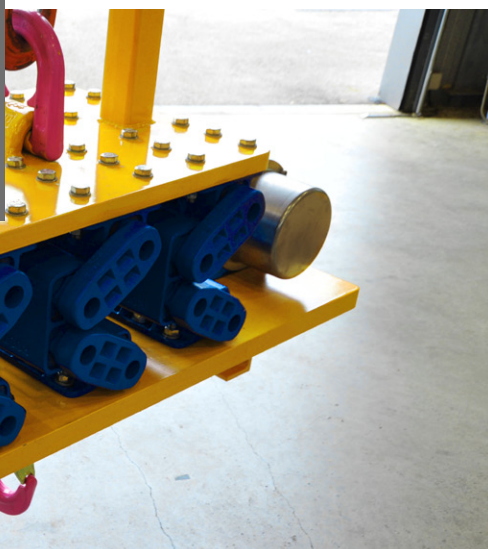

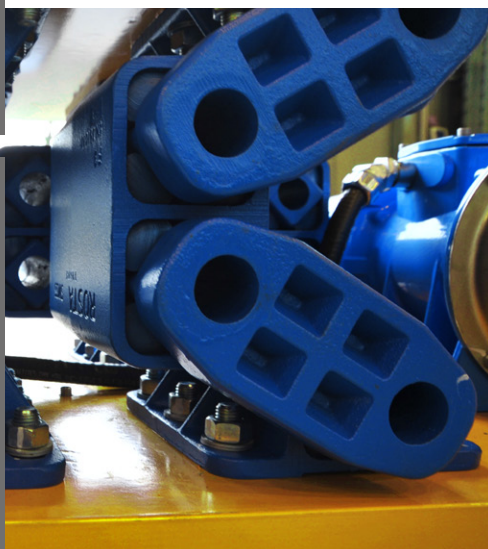

INGENIA vibrators are Tailor-made for the needs of the customer.

Particular care is taken to ensure that vibrations are not conducted into the lifting gear, but solely into the goods to be galvanised.

INGENIA vibrators can be mounted on intermediate lifting beams, or directly on the lifting gear hook.

## BENEFITS OF INGENIA VIBRATORS

- Reduction of zinc consumption
- Reduction of rework and clean up times
- Reduction of cook-off time
- Variable oscillation frequency
- Retrofitting capability
- Highest safety standards
- Ready for use
- Perfect in Combination with Crane Kit and Chain Hoist
